

THE PORT OF FUGLAFJÖRÐUR

Welcome to the Municipality of Fuglafjørður

Nestled in the heart of the Faroe Islands on the island of Eysturoy, the municipality encompasses the bustling town of Fuglafjørður, the neighbouring region of Kambsdalur and the picturesque and charming old village of Hellur.

Natural Harbour Facilities

The town of Fuglafjørður, stretching around the head of a deep fjord by the same name, offers an excellent natural harbour that is accessible

under all weather conditions. The quay is some 1000 meters in length. The port plays a significant role in the pelagic fisheries of the North Atlantic as well as the overall gross domestic production of the Faroe Islands. The town, with 3.3% of the total population, generates nearly 20% of the Faroese Export.

Diversity - Key to success

Ships and many flags land their catch at Havsbrún Ltd., the only fishmeal

production facility in the region with a production capacity in excess of 1100 tonnes per day. Associated with Havsbrún is a freezing plant for pelagic fish.

Carved out of the mountain towering Fuglafjørður is the largest cold store in the Faroe Islands, Bergfrost. Located near the harbour, the facilities are being enlarged to accommodate increasing demand.

Vónin, a world-reknown trawl and purse seine manufacturing company, is located alongside the port as well,

enabling repairs to expedited quickly and easily. Vónin produces a variety of pelagic and ground trawls.

Nearby, a modern engineering company, KJ Hydraulic, offers quality hydraulic and mechanical repairs and are specialists in hydraulic winches and cranes. JT Electric is a leader in the design of electrical systems for fish farming and its highly-skilled technicians can effect timely repairs.

Food, water and bunkering is also available at quay-side.

Quality, Highly-integrated Infrastructure

The Faroe Islands enjoys a world-class transport and telecommunications infrastructure. Well-paved roads, tunnels and ferries link all the towns and villages in the country. Satellite and transoceanic cables provide a variety of advanced telecommunications options, including high-speed, broadband data transmission.

The national carrier of the Faroe Islands, Atlantic Airways, provides daily service to Copenhagen as well as a variety of other destinations throughout the North Atlantic region. The ocean ferry, Norrøna, sails year-round to Denmark and in summer to other regional ports of call as well.

Cultural Haven of Distinction

Surrounded by a captivating and distinctive natural environment, Fuglafjørður is home to a rich cultural and artistic diversity. Artists thrive in the region capturing the subtle interplay of light and texture in the surrounding, luminous green mountains. Poets and musicians recount the tales of history and explore the confluence of the modern with the traditional.

Wherever your business takes you, whatever shop or office you might step into, a warm welcome awaits you, for we pride ourselves not only on the quality of our services, but also on the quality of our service and our hospitality.

MAP OF FUGLAFJØRÐUR

Fuglafjord Port - FACTS & FIGURES

Address : Fuglafjord Port, Bakka-
vegur 34,
FO-530 Fuglafjørð, Faroe Islands
Service : 24 hrs / 7 days .
Duty Officer, phone : + 298 737754.

such as bridges, power lines, locks
etc.

The fjord is wide and deep. There
are no rocks or other underwater ob-
structions.

The radar image can be used opti-
mally as a navigation aid. The tidal
currents run 6 hours in a northerly
direction and 6 hours in a southerly
direction at a speed of up to 4 knots
when there are strong currents.

Inside the fjord is no current

The difference between high and low
water is 1.0 metres.

The following forms are required by the authorities:

- One passenger manifest
- One embarking passenger manifest
- One crew manifest
- One stores list
- One customs declaration (ship)
- One customs declaration (crew)
- One deratting certificate

ANCHORAGE INFORMATION

Anchorage is available in Fuglafjord fjord. The depth at the anchorage is 25 to 35 metres.

The landing stage for tenders is not exposed to wind or swell and is sheltered in all kinds of weather.

The anchorage is approximately 3-10 cables from the landing stage. There are no shore launches available. The ship's tenders must be used and there is no levy payable.

The speed limit inside the fjord is 4 knots.

PILOT INFORMATION

Pilotage is not compulsory but is recommended.

The pilot is taken aboard at the entrance to the fjord,

The pilot also uses VHF channel 16 for call-up and channel 12 as working channel.

The pilot boat is blue with a white wheelhouse.

Pilot is available 24 hours

BERTHING INFORMATION

Ships can berth with either starboard or port side alongside. Line boats can be arranged.

The total length of berth in the harbour is 1000 metres with a depth of 7.0 -13.0 metres at MLWS.

There is one ro-ro ramp and oilpier 62 meters. There are no restrictions on air draught. The height of quay MW water is 1,70 metres.

There are two tugs available. One with a bollard pull of 12.3 tons and the other has 7.0 bollard pull.

Tugs are not compulsory and there are no special regulations regarding the use of tugs. Ship's lines are used.

Tugs and linesmen are available 24 hours.

Port officials and customs officials are on call 24 hours a day.

There are no local restrictions on arrival and departure times.

Local gangways are not available, so ship's gangways must be used.

FRESH WATER INFORMATION

Fresh water is available by hose (shore connection) only. The rate of supply is approximately 80 tons per hour – usually 2 hoses at 40 tons per hose. The shore connections are international.

GARBAGE/SEWAGE INFORMATION

Both dry and wet garbage can be landed. There is no barge available. The garbage containers are 2, 5 and 24 m³. There is a sewage lorry which can take sewage and sludge.

The Marpol sewage regulations are in force.

REPAIR FACILITIES/SECURITY

COLD STORAGE

Bergfrost is the cold store in Fuglafjørður. It offers the following services: storage of frozen fish products, loading and unloading, dealing with paperwork and other related matters.

The cold storage is in two tunnels, which have been blasted out of the mountain. This method of storage gives the customer extra assurance that the products will keep well.

We aim to make life easier for our customers and to help them make money. We do this by keeping the agreements we make and protecting quality. The customer gets the products when he needs them and in the same condition they were when delivered to us.
